

## NSG330 Research Methods

### Paper 3

#### **The Challenge!**

Using the literature review and problem/theoretical model as the main supportive evidence, write a final paper that incorporates one (1) two (2) and three (3) above. Include the proposed change(s) and how you would realistically implement and evaluate the change(s).  
(3-5 pages).

#### **Guidelines**

##### **Practice Change(s) and Evaluation (Paper Three)**

1. Discuss appropriate practice changes that can be implemented based upon your research findings.
2. Discuss replication of studies or modification of studies that might be done to further move the body of science forward.
3. Discuss how to realistically evaluate outcomes based on planned hypothetical changes. Be realistic and consider, time, cost, personnel, and efficacy of proposed changes.
4. Summarize and draw conclusions – what will this mean for patient or client outcomes and for the advancement of your profession.
