Prepare to be a leader in today’s business world.

**THE RIVIER UNIVERSITY ADVANTAGE**

Rivier’s Master of Business Administration (MBA) in Information Technology Management program offers a broad knowledge in traditional business management functions with added specialization in e-business, computer security, and process improvement.

The strength of the program lies in the faculty, who are experienced industry practitioners. The combination of a strong curriculum and faculty experience provides an education that stresses business fundamentals, addressing and resolving legal and ethical issues, communication challenges, and advancing business efficiencies through technological innovation.

Classes are offered online and in a hybrid format to accommodate busy schedules. Online classes maintain the same quality as face-to-face courses with the added benefit of 24-7 access and flexibility.

**ABOUT THE PROGRAM**

Core course requirements address the skills necessary to run a successful business—accounting, economics, finance, marketing, operations, data management, and innovation. Students learn to not only understand more complex business theory and practices, but also to apply, evaluate, and implement their learning in real-world situations.

Information technology courses provide focused study in e-business, IT facilities planning, quantitative process improvement, computer security, and data mining.

**INTERNSHIPS AND CAREERS**

Rivier University’s Career Development Center (CDC) is committed to student success. MBA students have the opportunity to gain valuable work experience through internship opportunities coordinated through the CDC. A variety of internships at local and regional companies are available; internships options change throughout the year according to businesses’ needs.

*MBA in Information Technology Management graduates can pursue careers as:*

- Computer Systems Managers
- Senior Directors, Technology & Infrastructure
- IT Directors
- IT Security Managers and Directors
- Vice Presidents of Information Technology
- Chief Information Officers

MBA in Information Technology Management graduates see the bigger picture. They have a strong business management foundation along with the technological knowledge and skills to lead an organization’s IT strategy, manage an IT team, implement new technologies, advance e-business, and effectively collaborate with other departments and divisions for more positive outcomes.
