Rivier
UNIVERSITY

M.S.
Master of Science in Computer Information Systems

Earn a degree in computer information systems

Bridge the gap between information technology and business management.

You'll work and thrive in the competitive world of business IT with an M.S. in Computer Information Systems from Rivier University.

Rivier's M.S. in Computer Information Systems will help you develop a unique combination of business expertise and technical competence, positioning you for leadership roles in almost any organization. With this master's degree, you will gain the ability to understand and develop a shared language between IT and business professionals while developing a firm grasp of current business trends and emerging technologies.

Available Facilities & Resources

Rivier partners with Dell and Microsoft to provide up-to-date technology in the Academic Computing Center laboratories and electronic classrooms. You will have access to a high-speed local area network and Windows, Linux, and Unix operating systems. Lab and classroom computers provide programming development environments for C/C++, Java, Python, SQL, UML, and R, among other languages. You will also have access to specialty software packages for computer graphics, architecture simulation, software engineering, networking technologies, data mining, and intelligent systems.

Choose Rivier

This program provides strong foundational knowledge and hands-on learning that build on your existing skill sets and confidence in computer science. On-campus and online course options provide greater flexibility to working students, and six 7-week terms annually offer a swift path to earning your degree. Rivier's program combines theory with significant practical experience that will give you an edge in meeting the demands of the high-tech workplace.
