I. INTRODUCTION

The policies, procedures and practices of the Doctoral Program (PsyD) in Counseling and School Psychology at Rivier University are guided by the policies of the most recent River University Academic Catalog: 2021-2022. This *Handbook* addresses policies, procedures, and practices specific to this Program. These may change with the refinement and evolution of the Program. Substitutions and/or additions to the Program's policies, procedures, and practices will be made in the form of Appendices to the *Handbook*; such additions will be incorporated as the *Handbook* is revised. Students will be notified of any changes and/or additions to the *Handbook* on an ongoing basis. The most current version is always available on the Program website and the Program Canvas page.

The purpose of this *Handbook* is fourfold: (1) to identify the specific policies, practices and procedures for the students, faculty, administrators and staff associated with the Program; (2) to outline the steps of doctoral study for all individuals associated with the Program; (3) to create a common text to which students, staff, faculty, and administrators may refer when seeking specific guidance on the process and expectations associated with doctoral study; and (4) to provide the forms and timelines associated with, and necessary for, completion of doctoral study.

The *Handbook* is organized according to the processes and phases of doctoral study. Each phase is addressed in terms of: (1) the University and Program policies relevant to steps in the process; (2) the role, relationship, and tasks associated with each step of the process; and (3) the relevant forms and steps necessary to complete each phase of the process. Each section addresses the specific needs of students and faculty participating in the Program, and the information will be amended based on the ongoing experiences of Program students and faculty obtained in the course of Program review and assessment.

Additionally, this *Handbook* is intended to facilitate student progress and provide a clear description of the requirements of the Doctoral Program. All faculty and students associated with the Program should make themselves familiar with (1) the contents of this *Handbook*, including all subsequent additions and/or amendments; and (2) the most recent *Rivier University Academic Catalog*. This *Handbook* was developed to augment policies and procedures set forth in the *Rivier Academic Catalog*. Faculty and students should respect these policies and procedures. If a situation arises which is not addressed in the *Handbook*, the policies and procedures of the *Rivier University Academic Catalog* shall apply.

II. MISSION AND PURPOSE OF RIVIER UNIVERSITY

Founded in 1933 by the Sisters of the Presentation of Mary, Rivier College (now University) is a Catholic institution of higher education dedicated to transforming hearts and minds to serve the world. As a co-educational institution of higher learning, the University is dedicated to the education of undergraduate and graduate students in both the liberal arts and professional courses of study.

Committed to the faith heritage, intellectual tradition, and social teachings of the Roman Catholic Church, the University educates the whole person in the context of an academic community that cultivates critical thought, sound judgment, and respect for all people. This community supports the intellectual growth of all its members while offering them opportunities for social, cultural, moral, and spiritual development. The challenge to the University community is to search for truth through the dialogue between faith and reason.

Rivier creates an environment in which integrated learning is the shared responsibility of students, faculty, staff, and administrators, and is pursued in all the curricular and co-curricular programs of the University. To participate in the life of Rivier University is to strive for academic excellence, to take responsibility for ourselves and for others, and to engage in dialogue about basic human issues facing society, especially the plight of the poor and powerless. The University extends to all of its members and also to the greater community an invitation to join in intellectual inquiry and dialogue.

III. PURPOSE OF THE DOCTORAL PROGRAM IN COUNSELING AND SCHOOL PSYCHOLOGY

The Combined Doctoral Program in Counseling and School Psychology builds on existing MA and EdS programs at Rivier University in clinical mental health counseling and school psychology that have been approved by the New Hampshire Department of Education. The Program was designed to intentionally integrate the two traditional practice areas of counseling and school psychology. This approach to doctoral training prepares health service psychologists to work in a variety of professional settings as licensed psychologists and is consistent with the generalist approach to training entry-level psychologists.

The Doctoral Program curriculum meets the New Hampshire state psychologist licensure requirements in New Hampshire and is consistent with the APA Standards of Accreditation of the American Psychological Association. The Program is APA-accredited, on contingency until April 7, 2024.

The Doctor of Psychology (PsyD) degree was proposed at the Vail Conference on Professional Training (in psychology) in 1973 in response to the need for a more practice-oriented degree that would meet the need for more clinically prepared practitioners in the field. The Rivier University PsyD in Counseling and School Psychology follows the practitioner-scholar model, which integrates clinical skills in assessment, diagnosis, treatment, and consultation with the empirical foundations of the discipline. The Program is designed to prepare graduates to obtain licensure as professional psychologists and to work in a variety of settings including independent practice and public service.

Students are prepared as critical thinkers and problem solvers who draw on the theory and knowledge of psychology and education to deliver empirically supported services. Students are trained to be consumers of research that informs their practice as skilled professionals delivering assessment, diagnosis, intervention, consultation, and preventive services.

The Program recognizes the importance of diversity inclusive of cultural and individual differences in the training of psychologists. The Program adheres to the definition provided by the APA Commission on Accreditation such that this includes, but is not limited to age, disability, ethnicity, gender, gender identity, language, national origin, race, religion, culture, sexual orientation, and socioeconomic status. The Program objectives and competencies reflect a focus on competent assessment and treatment of clinical populations with respect for client values, preferences, and diverse backgrounds.

The Program embraces the American Psychological Association's statement on Preparing Professional Psychologists to Serve a Diverse Public. The text of this statement is available in online at: <https://www.apa.org/ed/graduate/diversity-preparation>. Students are expected to read and become familiar with this statement.

Students are also expected to read and become familiar with APA Practice guidelines on serving diverse populations, which can be found at: <http://www.apa.org/pi/guidelines/index.aspx>.

IV. PROGRAM MISSION STATEMENT, AIMS, COMPETENCIES, AND ELEMENTS

1. Mission Statement

To prepare graduates in the Catholic intellectual tradition with the broad and general knowledge and skills to function as entry-level health service psychologists.

2. Aims of the PsyD Program

Aim 1: To graduate health service psychologists who are competent and reflective practitioner-scholars.

Aim 2: To graduate health service psychologists who are knowledgeable about and clinically skilled in the areas of assessment, diagnosis, intervention, multiculturalism, and supervision and consultation.

Aim 3: To graduate health service psychologists competent in the comprehension, conduct, and application of research to professional practice.

Aim 4: To graduate students with a strong commitment to their identity as health service psychologists and a strong commitment to ethical practice in psychology.

3. Competencies and Elements of the PsyD Program

To meet these aims, the Program has established the following competencies and related elements (or outcomes) to address discipline-specific knowledge and profession-wide competencies in health service psychology in the practice areas of counseling and school psychology:

Competency 1: Discipline Specific Knowledge

Discipline-specific knowledge represents the requisite core knowledge of psychology an individual must have to attain the profession-wide competencies.

Element 1a: Students demonstrate an appropriate mastery of the discipline specific knowledge of health service psychology (e.g., developmental, biological, cognitive/affective, and social aspects of behavior), and the history of the discipline of psychology.

Element 1b: Students demonstrate a substantial understanding of the integration of discipline specific knowledge of health service psychology.

Element 1c: Students demonstrate knowledge and competence in research methods, quantitative analysis, and psychometrics.

Competency 2: Communication and Interpersonal Skills

Students develop the ability to communicate and use interpersonal skills effectively in increasingly complex situations with increasing independence.

Element 2a: Students develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.

Element 2b: Students produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts.

Element 2c: Students demonstrate effective interpersonal skills and the ability to manage difficult communication well.

Competency 3: Professional Values and Attitudes

Students demonstrate behavior that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.

Element 3a: Students behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.

Element 3b: Students engage in self-reflection regarding one's personal and professional functioning; engage in activities to maintain and improve performance, well-being, and professional effectiveness.

Element 3c: Students actively seek and demonstrate openness and responsiveness to feedback and supervision.

Element 3d: Students respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.

Competency 4: Assessment

Students develop knowledge and skills in evidence-based theories and methods of assessment and diagnosis, including the selection, administration, and interpretation of assessments consistent with best scientific research evidence, the science of measurement, and psychometrics.

Element 4a: Students demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology

Element 4b: Students demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural).

Element 4c: Students demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process.

Element 4d: Students interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision making biases, distinguishing the aspects of assessment that are subjective from those that are objective.

Element 4e: Students communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.

Competency 5: Intervention

Students will develop proficiency in knowledge and practice of evidence-based approaches to the treatment of client's problems and needs, respectful of client's values, preferences, and diverse backgrounds.

Element 5a: Students establish and maintain effective relationships with the recipients of psychological services

Element 5b: Students develop evidence-based intervention plans specific to the service delivery goals.

Element 5c: Students implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.

Element 5d: Students demonstrate the ability to apply the relevant research literature to clinical decision-making.

Element 5e: Students modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking.

Element 5f: Students evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation.

Competency 6: Supervision

Students develop skills in mentoring and monitoring other professionals to help develop skill in professional practice.

Element 6a: Students demonstrate foundational knowledge and initial skills in the instruction, oversight, and supervision of trainees and other professionals.

Competency 7: Individual and Cultural Diversity

Students will develop knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.

Element 7a: Students demonstrate an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves.

Element 7b: Students demonstrate knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.

Element 7c: Students demonstrate the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability to apply a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own. Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.

Competency 8: Research

Students develop the ability to independently formulate research or other scholarly products that are of sufficient quality and rigor to contribute to the scientific, psychological, or professional knowledge base and acquire the knowledge and skills necessary for the critical review, evaluation, and presentation of psychological and research literature.

Element 8a: Students demonstrate and utilize substantial knowledge and skills and application in basic quantitative methods and data analysis, research design, and psychological measurement commonly used in psychology.

Element 8b: Students demonstrate and utilize skills in advanced research methods and data analysis appropriate in conducting research.

Competency 9: Ethical and Legal Standards

Students develop knowledge of, and adhere to, all relevant ethical and legal standards, guidelines, laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels in their professional work.

Element 9a: Students are knowledgeable of and act in accordance with each of the following: the current version of the APA Ethical Principles of Psychologists and Code of Conduct; relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels; and relevant professional standards and guidelines.

Element 9b: Recognize ethical dilemmas as they arise and apply ethical decision-making processes in order to resolve the dilemmas.

Element 9c: Students conduct themselves in an ethical manner in all professional activities.

Competency 10: Consultation and Interprofessional/Interdisciplinary Skills

Students develop skills to engage in consultation and interdisciplinary collaboration with individuals or groups to address problems and promote effectiveness in professional activities.

Element 10a: Students respect the roles and perspectives of other professions and demonstrate knowledge, skills, and attitudes regarding inter-professional and interdisciplinary consultation in all professional roles.

Element 10b: Students demonstrate knowledge of consultation models and practices.

V. ORGANIZATION AND GOVERNANCE

The Program is housed within the Division of Education and Counseling at Rivier University. Education and Counseling programs within the Division are accredited by the New Hampshire Department of Education (NHDOE). As such, programs follow the curriculum guidelines put forth by the NHDOE. The PsyD Program is accredited by APA and as such follows APA's curriculum guidelines. The Director of Training is responsible for the day-to-day administration of the Program. The Dean of the Division of Education has overall responsibility for the Program within the Division, and the Vice President of Academic Affairs provides institutional oversight.

Designated committees have been established in the Division of Education and Counseling and the Program to ensure the continuous involvement of faculty and students in Program decision-making. These committees are described below.

1. Division of Education and Counseling Faculty

Faculty from the Division of Education and Counseling offer important insight related to the Program's relationship to the Division as well as community partnerships. Division meetings provide a venue for review and input from all faculty in the Division of Education and Counseling.

2. Division Curriculum Committee

The Division of Education and Counseling Curriculum Committee develops, implements, and evaluates the PsyD Program curriculum, including all proposed additions, substitutions, deletions and/or changes in course titles, course descriptions, and/or program requirements. The review process developed by the Division Curriculum Committee is the formal review mechanism for the Program curriculum within the Division and the University. Committee membership includes a faculty member of the PsyD Program.

3. Core Faculty Committee

The Core Faculty Committee is composed of the Director of Training and all core faculty members in the Program (see *Appendix 1* for a list of Core Faculty). The Core Faculty Committee oversees the following Program functions:

- Reviews applications, conducts interviews, selects applicants, evaluates students, and participates in enrollment and reenrollment decisions.
- Reviews the policies and procedures of the Program; develops and implements Program initiatives; and discusses the roles of Program faculty.
- Reviews routine operations related to the implementation of Program changes.

In addition, the Core Faculty Committee is responsible for teaching foundation and core courses, advising students, serving on Doctoral Research Project Committees, conducting Annual Reviews, and evaluating various Learning Experiences.

4. Program Committee

The Program Committee consists of the Core and Associated Faculty of the Program. The primary purpose of the Committee is to engage in assessment for continuous improvement of the Program and to review all Program policies and procedures. The Committee meets on an annual basis. Contributing faculty are invited to attend these meetings.

5. Student Advisory Committee

The Student Advisory Committee consists of a student representative from each cohort who is selected by members of the cohort. The primary purpose of the Committee, which meets at least once each academic semester, is to promote communication between and within the student cohorts, to facilitate Program-level communication between students and faculty, and to

provide input on Program policies and procedures as well as proposed changes. Program initiatives are reviewed and discussed with the Student Advisory Committee on an ongoing basis. A faculty representative also serves as a member of the Student Advisory Committee.

VI. PROGRAM ADMISSION

1. Admissions and Enrollment Overview

The Program accepts and enrolls a diverse student group each fall semester. The process of admissions begins with the student's application and continues with the notification of admission decisions by the Core Faculty Committee through orientation and enrollment. Correspondence with applicants is primarily handled by the Office of Graduate Admissions, but applicants and incoming students also communicate with the Director of Training.

Students need a minimum of a bachelor's degree to be considered for admission to the Program. The number of credit hours required to complete the Program is dependent on previously completed coursework. There is no upper limit to the number of foundation courses that can be counted toward completion. However, only 9 credit hours of doctoral course(s) at the 800 level can be transferred into the program.

Students who enter the program may earn an EdS in Counseling en route to the PsyD degree. **Students are never admitted to the Program for the purpose of completing another degree. Students enrolled in the Program do not complete a master's degree en route.**

The Program includes the following requirements for successful completion of the degree:

- 57 credit hours in foundation coursework (or their equivalent)
- 43 credit hours in core doctoral coursework
- 6 credit hours in tiered doctoral practicum experiences
- 5 credit hours in doctoral research coursework and successful defense of the Doctoral Research Project
- 9 credit hours in elective doctoral coursework
- Successful completion of Written and Oral Comprehensive Examinations
- A full-time internship experience (2000 hours)

The following courses constitute the PsyD program foundation coursework:

- ED 501 Fundamentals of Research (3)
- ED 505 Advanced Psychology of Human Development (3)
- ED 530 Assessment of Learning & Reading Disabilities (3)
- ED 538 Cognitive Assessment I (3)
- ED 610 Basic Human Interaction (3)
- ED 611 Psychotherapy for Children (3)
- ED 614 Clinical Counseling Theories (3)
- ED 615 Clinical Counseling Techniques (3)
- ED 616 Group Counseling (3)

- ED 618 Professional Orientation and Ethics Clinical Mental Health Counseling (3)
or
- ED 701 Foundations of School Psychology (3)
- ED 623 Marriage and Family Therapy (3)
- ED 624 Psychopathology (3)
- ED 625 Testing and Assessment (3)
- ED 629 Addictive Behaviors (3)
- ED 681 Career and Lifestyle Development (3)
- ED 704 Personality Assessment I (3)
- ED 705 Neuropsychological Assessment I (3)
- ED 720 Social/Cultural Foundations of Counseling and Education (3)
- ED 721 Advanced Multicultural Perspectives (3)

Courses that may be credited toward foundation coursework in the Program will be reviewed during the admissions process. Any such courses must have been taken at a regionally accredited institution with an earned grade of “B” at the graduate level (500 or above). These course(s) appear on the student’s Program of Study indicating that the requirement and content for the identified course(s) are met. Credits granted to satisfy specific foundation course requirements do not appear on the Rivier University transcript.

2. Admissions Criteria and Materials

Applicants are reviewed and evaluated on the following criteria and materials:

- For admission to all Rivier University graduate programs:
 - Transcripts from all colleges and universities attended
 - Letters of reference (see *Letters of Reference* below)
 - Statement of purpose (see *Admission Requirements* below)
- For admission to the PsyD Program:
 - A minimum of an earned bachelor’s degree from an accredited institution
 - Resume or CV
 - Undergraduate GPA, with a preference of 3.0 and above
 - Graduate GPA, with a preference of 3.5 and above (if relevant)
 - General GRE scores earned within the last 5 years
 - For students whose native language is not English, evidence of proficiency in the English language. Official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS) and the Pearson Test of English (PTE) are accepted. The Program requires minimum scores of TOEFL (95), IELTS (7.0), and PTE (66)
 - Interview with the Core Faculty Committee
 - Evidence of commitment to the values, goals, and mission of the Program in the Statement of Purpose and letters of reference

3. Application Requirements

A complete application must be received by the Admissions Office by midnight of the annual deadline date. The application must include:

- A completed and signed online application, available through www.rivier.edu/PsyD
- A \$100.00 non-refundable application fee
- Official transcripts from all undergraduate and graduate institutions where the applicant has received degrees and/or course credit
- A written statement of purpose that reflects on the following:
 - Applicant's professional experience and how it relates to doctoral study
 - Applicant's reasons for pursuing doctoral study
 - Research and/or clinical goal(s), problem(s), and/or question(s) the applicant may wish to address during doctoral study and research
 - Description of how doctoral study will enhance the applicant's personal and professional career goals
 - Explanation of how and why the applicant is a good fit for the Program
 - Identification of diversity experiences and evidence of a commitment to serving diverse populations
- Writing sample
- At least three (3) letters of reference that speak to the applicant's professional and/or academic work, potential for successful completion of doctoral study, and character. Letters of reference must have been written within six months of the date of the completed application.

4. Application Review Process

The Admissions Office forwards completed applications to the Admissions Committee. Committee members independently review and rate the applications. These ratings are then reviewed at a meeting of the Core Faculty Committee. Finalists for admission are interviewed by members of the Core Faculty Committee. Following the interview, the Core Faculty Committee reconvenes to discuss applicants. The Core Faculty Committee selects applicants for admission to the Program. Following this review, the Office of Graduate Admissions notifies applicants of their admission status. Applicants must accept the offer by April 15th.

5. Interviews

Finalists for admission are invited to campus for interviews with members of the Core Faculty Committee. Depending upon circumstances and availability, some interviews may be conducted with video conferencing. Interviews are conducted in individual and/or group formats. At this interview, applicants are asked to clarify and/or expand on aspects of their application, including but not limited to their personal statement of purpose and reasons for seeking doctoral study.

6. Application Deadlines

Each spring, prior to the application cycle for the upcoming academic year, the Director of Training provides a timeline for the admission process. Unless otherwise advertised on the website, the dates for the admission cycle are:

February 1	Application deadline
February	Notification of interview decisions
March	Interviews with Core Faculty Committee
April 1	Notification of admission decisions
April 15	Student notification of decision deadline

7. Application Withdrawal

Applicants who wish to withdraw their application to the Program should notify the Admissions Office in writing. The University retains application documents for a period of seven years from the date of withdrawal.

8. Deferral of Admission

Applicants selected for admission who wish to defer the start of their program should submit their request, in writing, to the Director of Training, providing: a statement making the request for deferral official, the reasons why a deferral is sought, and the proposed timeframe for initiating study. The Core Faculty Committee reviews these requests, and the Director of Training communicates the decision in writing to the applicant. The decision of the Core Faculty Committee is, in every case, made with the review and concurrence of the Dean of the Division of Education and Counseling. Deferrals of Admission are not automatically granted.

9. Diversity

Rivier University does not discriminate on the basis of race, color, national origin, religion, age, veteran or marital status, sex, gender identity, sexual orientation, or disability in admission or access to, treatment in, or employment in its programs and activities. Title IX requires that the University not discriminate on the bases stated above. Further, the Program seeks to recruit and retain diverse students.

10. Orientation

Entering students are required to attend a program orientation, which takes place at Rivier University in the summer of the academic year prior to the student's first semester of classes. The orientation generally takes one or two days; the length depends on the size and needs of each incoming class.

Orientation brings together all newly admitted students, along with the Director of Training, core faculty members, and select officers of Rivier University to introduce students to the

Program requirements, the practitioner-scholar model, the combined-integrated training model, and the curriculum for the Program, as well as the resources, mission, and purpose of the University.

11. Academic Advisor

The Director of Training will assign each incoming student to an academic advisor. Academic advisors are members of the core faculty. Every attempt will be made to pair students with faculty members who have similar interests and experiences (i.e., clinical, research). Students must meet with their academic advisors at least one time each semester for advice and consultation as they proceed through the Program. Students meet with their advisor as part of the Annual Review process (see *Section XII; Subsection 2: Annual Review*). The Director of Training is also available to meet with and advise students on their Program of Study.

VII. PROGRAM OF STUDY

The Program is designed to be completed in no fewer than 5 years, including a three-year academic residency and a 2000-hour internship. All students are expected to attend full-time, including the fall, spring, and summer semesters. The Program requires completion of the following requirements:

- Foundation coursework (57 credits or their equivalent)
- Doctoral coursework, including core and elective classes (52 credits)
- Practicum experiences (6 credits)
- Successful defense of a written Doctoral Research Project (5 credits)
- Successful completion of Comprehensive Examinations (0 credits)
- A 2000 hour internship (0 credits)

Students who enter the Program without having previously completed any related graduate coursework are required to complete a minimum of 120 credits to earn their PsyD degree in the Program. For students who have taken some graduate level coursework in a related field of study, there is no limit to the number of foundation courses that can be counted toward the Program. However, only 9 credit hours of doctoral course work can be transferred into the Program. The number of credit hours required to earn the PsyD degree is dependent on the courses that students have completed prior to entering the Program; therefore the Program of Study is often unique to each student who enters with applicable foundation courses and transfer credits.

Individual *Program of Study forms* (Appendix 2) are filled out by the student's academic advisor in collaboration with the student and the Director of Training. Program of Study forms are kept on file in the Division of Education and Counseling. The Program of Study form serves as a plan for students to follow semester by semester and is structured to ensure that their educational experience is cumulative, sequential, and graded in complexity. The form may also help students determine selection and timing of their elective courses. It is the student's responsibility to periodically review the Program of Study, including during the Annual Review, to ensure an accurate version is on file with the Director of Training.

1. Guidelines for Development of Program of Study

Students and academic advisors are expected to adhere to the following guidelines in developing Programs of Study:

- Students complete foundation coursework before beginning core coursework
- Students enroll in no more than four (4) foundation courses per semester
- Students enroll in no more than three (3) core courses per semester
- Students begin practicum coursework by their second year in the Program (provided that all pre-requisites are met)
- Students follow the Basic Content Area Cluster requirements
- Students follow the Research Sequence
- Students create a balanced Program of Study that integrates coursework, practicum experiences, and work on the Doctoral Research Project
- Students should use the core course offering schedule (see *Appendix 3*) to determine timing for the completion of core courses.

2. Method of Instruction

Program students will encounter various methods of instruction over the course of their studies, including online, hybrid, and face-to-face instruction. Online courses do not meet on campus: all instruction and communication among the students and between the students and the instructor takes place online, through Canvas and other available learning or information management tools. Hybrid courses employ these tools, as well as regularly scheduled face-to-face meetings on campus. Face-to-face classes make full use of learning management tools.

The format for foundation courses varies each semester. Students should consult with the University course schedule and their academic advisor to determine which courses are being taught in a particular format and also to determine the best timing for enrollment in each foundation course. When courses are offered in more than one format, doctoral students should take hybrid or face-to-face courses whenever possible.

Consistent with most state licensure guidelines for psychologists, as well as APA requirements, course instruction is predominantly face-to-face. All core (800-level) courses, except ED 801 History and Systems of Psychology, which is online, are offered in a traditional face-to-face or hybrid format. The following core (800-level) courses are presented in a hybrid format:

- ED 804 Social Bases of Behavior
- ED 809 Psychometrics

Consistent with the 2008 Higher Education Opportunity Act, Rivier University ensures that a student who registers or receives credit for a course that uses any form of distance, online, or electronically-mediated education is the same student who participates in and completes that course.

3. Rivier University Policy for Transfer Credits

Foundation courses are not transferred into the Program via university mechanisms. Please see *Section VI, Subsection 1. Admissions and Enrollment Overview* for information on waiving foundation credits.

Core (800-level) courses taken at other colleges or universities that students wish to apply to their program of study must be transferred. The policy of Rivier University for transferring credits in from another college or university, as stated in the Rivier University Academic Catalog 2021-2022 (<https://catalog.rivier.edu/index.php>) is as follows:

Candidates for a [graduate] degree at Rivier University may transfer a maximum of nine graduate credits, provided that: (1) these credits were earned at an accredited college or university, (2) these credits are of a B grade or better, (3) the course(s) were completed within the past six years, (4) these credits have been approved by the Dean/Director of Training.

4. Program Policies for Transfer Credits

Students may apply to transfer credits for core courses (800-level) they take at another University, in which case they are credited for the specific course and the credits accepted for transfer, both of which appear on the transcript. Credits applied toward foundation coursework are not eligible for transfer credit, but they are applied toward the Program of Study.

There is no guarantee that courses taken at another institution will be accepted for transfer credit at Rivier University. Students complete the *Request for Course Transfer Form (Appendix 4)* and meet with the Director of Training to discuss the request, which is then reviewed by the Director of Training and the appropriate course instructor.

Students must submit the following materials to have a core course reviewed for transfer credits: (1) a copy of the course description for the course from the institution's catalog; (2) a copy of the page in the catalog showing the numbering system for courses at the institution; (3) a copy of the syllabus for the course; and (4) a copy of the final transcript for the course showing a grade of "B" or higher.

5. Overview of Courses

Programs of Study will vary based on foundation and transfer credits awarded, as well as advisor recommendations that will take into consideration course prerequisites and the structure of the curriculum. Descriptions of all courses and course prerequisites are available in the Academic Catalog (2021-2022) at: <https://catalog.rivier.edu/index.php>

Foundation courses must be completed before core doctoral coursework begins. The Basic Content Area Cluster and Research Sequence must be followed (see details below). Practicum experiences are tiered and must be taken in numerical sequence, as

described in the *Practicum and Internship Handbook*. Doctoral Research Project courses require continuous enrollment until the Doctoral Research Project is successfully defended as described in the *Doctoral Research Project Handbook*.

6. Prerequisite Courses

Prerequisite	Course
ED 501 Fundamentals of Research*	ED 864 Research Methods and Design in Psychology
ED 505 Advanced Psychology of Human Development*	ED 820 Developmental Psychology
ED 538 Cognitive Assessment I*	ED 810 Cognitive Assessment II
ED 610 Basic Human Interaction*	ED 614 Clinical Counseling Theories
ED 611 Psychotherapy with Children*	ED 815 Evidence Base Treatment: Children and Families
ED 616 Group Psychotherapy*	ED 814 Seminar in Group Psychotherapy
ED 618 Professional Orientation and Ethics of Clinical Mental Health Counseling* or ED 701 Foundations of School Psychology*	ED 821 Health Service Psychology: Ethics and Standards
ED 624 Psychopathology*	ED 806 Seminar: Psychopathology and Interventions
ED 704 Personality Assessment I*	ED 812 Personality Assessment II
ED 705 Neuropsychological Assessment I*	ED 835 School Neuropsychology
ED 720 Social and Cultural Foundations*	ED 721 Advanced Multicultural Perspectives

*** or equivalent**

7. Foundation Courses

Foundation courses must be completed before core doctoral courses begin. Fifty-seven credits of the Foundation courses or their equivalent are required. Many foundation courses are prerequisites for core courses. All foundation courses provide students with the background knowledge necessary to engage in higher level thinking in the core courses. Foundation courses are not evaluated learning experiences to demonstrate mastery of discipline specific knowledge or profession wide competencies. Foundation courses are also open to MA and EdS students.

- ED 501 Fundamentals of Research (3)
- ED 505 Advanced Psychology of Human Development (3)
- ED 530 Assessment of Learning & Reading Disabilities (3)
- ED 538 Cognitive Assessment I (3)
- ED 610 Basic Human Interaction (3)
- ED 611 Psychotherapy for Children (3)

- ED 614 Clinical Counseling Theories (3)
- ED 615 Clinical Counseling Techniques (3)
- ED 616 Group Counseling (3)
- ED 618 Professional Orientation and Ethics of Clinical Mental Health Counseling (3)

or

- ED 701 Foundations of School Psychology (3)
- ED 623 Marriage and Family Therapy (3)
- ED 624 Psychopathology (3)
- ED 625 Testing and Assessment (3)
- ED 629 Addictive Behaviors (3)
- ED 681 Career and Lifestyle Development (3)
- ED 704 Personality Assessment I (3)
- ED 705 Neuropsychological Assessment I (3)
- ED 720 Social/Cultural Foundations of Counseling and Education (3)
- ED 721 Advanced Multicultural Perspectives (3)

8. Core Courses

Enrollment in core courses begins after the completion of foundation courses. Forty-three credits are required. The required course sequences are described below.

- ED 801 History and Systems (2)
- ED 802 Biological Bases of Behavior (3)
- ED 803 Cognitive-Affective Bases of Behavior (3)
- ED 804 Social Bases of Behavior (2)
- ED 806 Seminar: Psychopathology and Interventions (3)
- ED 809 Psychometrics (2)
- ED 810 Cognitive Assessment II (3)
- ED 812 Personality Assessment II (3)
- ED 815 Evidence-Based Treatment: Children and Families (3)

or

- ED 816 Evidence-Based Treatment: Adults (3)
- ED 820 Developmental Psychology (3)
- ED 821 Health Service Psychology: Ethics and Standards (3)
- ED 825 Aging (3)
- ED 833 Supervision, Consultation & Systems (3)
- ED 838 Seminar: Internship and Professional Development (1)
- ED 864 Research Methods and Design in Psychology (3)
- ED 881 Quantitative Analysis in Psychology (3)

Advisors work with students to ensure they complete the Basic Content Area Cluster and Research Sequence as required.

Basic Content Area Cluster

There are five basic content areas of scientific psychology in which Counseling and School Psychology students are expected to have foundational knowledge. These areas are covered across four core courses in the Program. Students are expected to complete all four of these courses in no more than two years. Further, ED 820 Developmental Psychology must be the final Basic Content Area course from the cluster to be taken, at which time students will complete their Integrated Assignment.

- ED 802 Biological Bases of Behavior (3)
- ED 803 Cognitive-Affective Bases of Behavior (3)
- ED 804 Social Bases of Behavior (2)
- ED 820 Developmental Psychology (3)

Research Sequence

The research sequence provides students with a sequential experience in developing basic knowledge about research methods and data analysis, culminating in the application of that knowledge to their Doctoral Research Project. Students are expected to enroll in these courses in the order listed below.

1. ED 864 Research Methods and Design in Psychology (3)
2. ED 881 Quantitative Analysis in Psychology (3)
3. ED 892 Directed Research in Psychology (2) (*see below*)
4. ED 896 Research in Psychology (3) (*see below*)

9. Elective Courses

Nine elective credits are required. Students should work with their advisor to determine which elective courses are a good fit with their professional goals and interests. They should also work together with their advisor to determine the timing of elective courses.

- ED 807 Psychopharmacology (3)
- ED 808 Foundations of Neuropsychology (3)
- ED 814 Seminar: Group Psychotherapy (3)
- ED 830 School-Based Consultation (3)
- ED 831 Classroom-Based Assessment (3)
- ED 832 Community Consultation (3)
- ED 835 School Neuropsychology (3)

10. Doctoral Research Project Courses

Students are required to enroll in a minimum of five credits toward their Doctoral Research Project. This includes a minimum of two credits for the development of the proposal and a minimum of three credits for the execution and defense of their Doctoral Research Project. Continuous enrollment is expected in both courses until the successful defense of the proposal

and the project. It is possible that students will accrue more than the required five credits toward their doctoral research project.

- ED 892 Directed Research in Psychology (2)
- ED 896 Research in Psychology (3)

11. Practicum and Internship Courses

Six practicum credits are required and may be earned through completing either: (1) three foundation practicum courses (Tier-One) and three core practicum courses at the 800 level (Tier-Two); or (2) six practicum courses at the 800 level (Tier-Two and Tier-Three) for students who enter the program having completed a full-time, masters-level internship in a related area, as determined by the Director of Training. Students register for practicum courses in numerical order due to the tiered nature of the experiences. Practicum Courses may be offered through a synchronous, virtual classroom to allow students to remain on site at their practicum placements while attending class.

- Tier-One
 - ED 792 Initial Practicum I (1)
 - ED 793 Initial Practicum II (1)
 - ED 794 Initial Practicum III (1)
- Tier-Two
 - ED 840 PsyD Practicum I (1)
 - ED 841 PsyD Practicum II (1)
 - ED 842 PsyD Practicum III (1)
- Tier-Three
 - ED 843 Advanced Clinical Experience I (1)
 - ED 844 Advanced Clinical Experience II (1)
 - ED 845 Advanced Clinical Experience III (1)

All students must complete a full-time internship (see Section X: Internship) and will register for the Clinical Internship courses (zero credits) when participating in the internship experience. There are no scheduled meetings or assignments for this course during the year students are on internship. The course registration is necessary to keep Predoctoral Interns in active-student status within the university.

- ED 886 Clinical Internship (0)
- ED 887 Clinical Internship (0)

12. Course Evaluation

Course grades represent the instructor's assessment that a student has demonstrated the skills described below at an appropriate level of achievement for that course. Students are required to earn a minimum grade of B for all Program courses (foundation and core). Students are required to earn a P in all non-graded courses (e.g., Doctoral Research Project courses). Please see *Section XII; Subsection 1: Academic Standing* for more information about this.

- An understanding of course material and discipline-specific concepts
- The ability to apply understanding and knowledge
- The ability to communicate this understanding
- The ability to think critically about course concepts
- The ability to make and support value judgments about course material
- The ability to integrate concepts and ideas

The following grading system is used for Graduate and Doctoral Studies at Rivier University:

A (4.0)

Indicates a level of excellence in completing the goals of the course, understanding the concepts of the discipline, and in demonstrating skills of applying, valuing, judging, synthesizing, and communicating. (Numerical equivalent: 94-100)

AB (3.5)

Indicates a high level of achievement in completing the goals of the course, understanding the concepts of the discipline, and in demonstrating skills of applying, valuing, judging, synthesizing, and communicating. (Numerical equivalent: 90-93)

B (3.0)

Indicates a satisfactory level of achievement in completing the goals of the course, understanding the concepts of the discipline, and in demonstrating skills of applying, valuing, judging, synthesizing, and communicating. (Numerical equivalent: 84-89)

BC (2.5)

Indicates a low level of achievement in completing the goals of the course, understanding the concepts of the discipline, and in demonstrating skills of applying, valuing, judging, synthesizing, and communicating. This grade represents a failure to complete course requirements as a student in the PsyD Program. (Numerical equivalent: 80-83)

C (2.0)

Indicates that a student has taken the course but that the student's knowledge of the subject matter reflects an unsatisfactory level of achievement. This grade represents a failure to complete course requirements as a student in the PsyD Program. (Numerical equivalent: 74-79).

F (0)

Indicates that the student has insufficient understanding of the course material and insufficient achievement in applying, communicating, or evaluating and synthesizing course material. No credit is given. This grade represents a failure to complete course requirements as a student in the PsyD Program. (Numerical equivalent: 0-73)

P (0)

Indicates that the student has passed a course or sufficiently completed a non-graded course that has been designated by the program faculty and has been approved by the Academic Council for P/F grading. The accumulation of grades of pass (P) in proposal and dissertation research does

not imply completion of the research; such grades indicate satisfactory progress. (Numerical Equivalent: 84-89)

W (0)

Indicates withdrawal from a course, which can be done no later than the tenth week of a regular semester or by the end of the fourth week of a summer session. Deadlines for course withdrawal are listed in the Academic Calendar each semester on the Rivier website at:

<https://catalog.rivier.edu/content.php?catoid=114&navoid=2084>

NF (0)

Indicates that the student has not given official notification of withdrawal from a course in writing. An NF (administrative failure) is counted as credits attempted, equal to an F on the student's record. Deadlines for course withdrawal are listed in the Academic Calendar each semester on the Rivier website at:

<https://catalog.rivier.edu/content.php?catoid=114&navoid=2084>

I (0)

A student is expected to complete the requirements of each course by the end of the semester or term in which the course is offered. If for some major reason beyond their control the student is prevented from taking the final as scheduled or does not complete some part of the course requirements, the student may ask the instructor to assign the temporary grade of Incomplete "I". This request must be made before the scheduled final examination. It is the student's responsibility to remove this temporary grade before the end of the fourth week of the following semester or term. (See the University Calendar). Otherwise, the student automatically incurs an F for the course. In unusual cases, the student may request in writing an extension of this period. The extension may not exceed a three-month period and must have the approval of the dean of the division.

AU (0)

Indicates that the student has merely audited the course without credit.

13. Minimum Levels of Achievement for Learning Experiences

The program is structured to include key learning experiences that have outcomes related to Program competencies/elements. See *Appendix 5* for a *Curriculum Competency Map* showing the relationship of learning experiences, competencies, and elements. Each learning experience has a minimum level of achievement that students must meet. Students who do not earn the minimum level of achievement set for a learning experience will receive detailed feedback from the Core Faculty Committee and meet with their academic advisor to discuss steps for improvement. Below are Program learning experiences and minimum levels of achievement.

Learning Experience	Minimum Level of Achievement
Core Coursework	Course Grade B
Integrated Assignment from Basic Content Area Cluster*	70% Score
Written Comprehensive Examination: Multiple Choice	70% Score

Written Comprehensive Examination: Change Theory Paper*	70% Score
Written Comprehensive Examination: Case Conceptualization*	70% Score
Oral Comprehensive Examination	Faculty Rating Pass
Practicum Placements: Supervisor Evaluation	Minimum Rating 3 in relevant area
Internship: Supervisor Evaluation	Satisfactory Ratings
Doctoral Research Project	Faculty Rating Pass
Disposition Forms	Minimum Rating 3 in all areas

**Rubric provided at the time of learning experience to help students understand and meet learning experience expectations*

14. Competency Evaluation

Students are responsible for working with their advisors and the Core Faculty Committee to demonstrate progress toward meeting Program competencies. Students achieve this by compiling and presenting evidence from learning experiences to faculty during their Annual Review (see *Section XII; Subsection 2: Annual Review*). The review of learning experiences provides information on student progress toward Program competencies and elements. The Core Faculty Committee considers all submitted evidence from learning experiences to provide an overall rating of student progress toward each element and competency. *Students must obtain a rating of 3 (the minimum level of achievement) or better to be making adequate progress in the Program toward relevant outcomes.* Using submitted learning experience artifacts, the faculty rate students on each competency/element using the following scale:

1	No progress made toward this competency and outcome elements.
2	Minimal progress made toward this competency and outcome elements.
3	Expected progress made toward this competency and outcome elements.
4	Student demonstrated mastery of this competency and outcome elements.

If students do not participate in learning experiences related to given elements during an annual review period, faculty do not rate those elements. Students who do not achieve a rating of 3 or higher are placed on an action plan to assist the student in progressing toward achievement of Program elements and competencies.

15. Outside Employment

The Program requires students to limit outside employment to *no more than 20 hours per week* while enrolled. This allows students to devote time to program activities and events, practicum placements, research, and faculty advising and mentoring.

16. Dedicated Day on Campus

The Program requires students to be on campus on one established day of the week. This day is designed to provide students with opportunities for ongoing interactions with peers and faculty that will contribute to their socialization and development as psychologists. Some courses (but not all) are offered on this day, along with Program learning experiences (e.g., comprehensive examinations, doctoral research project defenses). The Program also offers regularly scheduled professional development and diversity events on this day. Students should not schedule outside employment responsibilities or practicum responsibilities on the dedicated weekday on campus. The day is selected and established prior to the beginning of each academic year. See the Program Calendar.

17. Program Calendar

Prior to the start of each academic year, a Program Calendar outlining all important University and Program dates (events, learning experiences, etc.) is published. This calendar allows students to plan the academic year without conflicts related to University and Program events and expected attendance at events beyond coursework.

VIII. COMPREHENSIVE EXAMINATION

The comprehensive examination includes both written and oral components. The purpose of the examinations is to assist students in developing the integration and evaluation of the scientific knowledge, research, and professional service of Counseling and School Psychology. The examination also provides a measure of progress toward Program competencies. The date and times of the exams are listed on the Program Calendar annually. Students must satisfactorily complete all sections of the comprehensive examination before the Director of Training can sign the internship readiness form, a pre-requisite for application to internship.

Students are eligible to sit for the examinations after completing the required courses, listed below. Students must submit the *Eligibility for Written Comprehensive Examinations form* (Appendix 6) to obtain formal approval to participate in the Comprehensive Examination process. All foundation courses (or their equivalent) and the following core courses must be completed with a grade of B or better before the student is eligible to take the Written Comprehensive Examination:

- ED 801 History and Systems
- ED 802 Biological Bases of Behavior
- ED 803 Cognitive/Affective Bases of Behavior
- ED 804 Social Bases of Behavior
- ED 806 Psychopathology and Interventions
- ED 809 Psychometrics
- ED 820 Developmental Psychology
- ED 821 Health Service Psychology: Ethics and Standards
- ED 815 Evidence-Based Treatment: Children and Families **OR**

- ED 816 Evidence-Based Treatment: Adults
- ED 810 Cognitive Assessment II
- ED 812 Personality Assessment II
- ED 864 Research Methods in Psychology
- ED 881 Quantitative Analysis in Psychology

1. Written Examination Content

There are three parts to the written comprehensive exam:

- Change Theory Articulation Paper
- Case Conceptualization
- Core Question Examination (of discipline-specific knowledge)

The details of each section of the examination are provided on the Program Comprehensive Examination Canvas page. The specific dates for each part of the exam will be provided at the beginning of the semester.

Change Theory Articulation Paper

This portion of the exam consists of an 8-10-page (with references) theory articulation paper prepared prior to the examination date. This paper provides a foundation for the case conceptualization response (see below). In the theory articulation paper, students are expected to describe their theory of working with clients who have both emotional/social and vocational/academic concerns (i.e., integrating theoretical and practical knowledge). A scoring rubric is provided to guide student's work to ensure all required areas are addressed. Students must pass this portion (and the Case Conceptualization) of the written examination to advance to the oral examination.

Case Conceptualization

Students are provided the choice of an adult or child/adolescent case example to use for the Case Conceptualization. Regardless of which option students select, they should refer to their Change Theory Articulation Paper while working on the case conceptualization part of the exam and should assume that the readers will be familiar with their Change Theory Articulation Paper. Students may draw from other theories besides their own if they feel the case example necessitates a broader focus. Students should provide literature citations from both the Change Theory Articulation Paper and other sources to support their case conceptualization and critique. A scoring rubric is provided to guide student's work to ensure all required areas are addressed. Students must pass this portion (and the Change Theory Articulation Paper) of the written examination to advance to the oral examination.

Core Question Examination (of Discipline-Specific Knowledge)

The purpose of the Core Question Examination is aimed at assessing students' discipline-specific knowledge of core areas of psychology (cultural and individual differences, biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, history and systems, ethics, and research) and their knowledge of counseling and school psychology. This section of the Comprehensive Examination is designed to align with the Examination for

Professional Practice in Psychology (EPPP) in terms of format and content. This portion of the exam is made up of 100 multiple choice questions. Students do not need to pass this portion of the written examination to advance to the oral examination. Students must pass this portion of the written examination to be approved to apply for internship.

2. Written Examination Reevaluation

If a student does not receive a “Pass” on the Change Theory Articulation Paper or the Case Conceptualization, faculty will provide feedback to the student on the scoring rubric for the relevant section(s) and return the examination to the student. The student must retake the specific section(s) the next time the exam is scheduled to be administered. Students may retake these examinations once. Should the student fail the Change Theory Articulation Paper or Case Conceptualization twice, the student may submit a formal request to the Core Faculty Committee in writing to obtain permission for additional attempts.

If a student does not pass the Core Question Examination, an item analysis by content area is conducted by the examination supervisor. Students receive a full report of performance by content area. Any content area for which a student did not obtain a score of 70% or higher must be retaken the next time the exam is scheduled. Should the student fail the Core Question Examination twice, the student may submit a formal request to the Core Faculty Committee in writing to obtain permission for additional attempts.

When a student petitions to retake a portion of the exam, the request should outline (1) why the student believes that they will be successful in the third attempt, (2) all of the steps that they are taking to prepare for the reexamination above and beyond what has been done for previous attempts, and (3) their timeline for accomplishing these steps leading up to the next exam period.

3. Oral Examination Content

Once a student passes the Change Theory Articulation Paper and the Case Conceptualization, they advance to the oral examination. The specific dates for the oral examination will be provided at the beginning of the semester. The oral comprehensive examination provides an opportunity for students to discuss their Change Theory Articulation Paper and Case Conceptualization. Students are expected to defend and expand on the Change Theory Articulation Paper and Case Conceptualization while demonstrating general and specific knowledge of counseling and school psychology.

The student meets with a committee of three core faculty members for no longer than one hour, during which time a brief presentation of the Case Conceptualization, as it relates to the Change Theory Paper, is provided by the student. Committee members then ask 2-3 rounds of questions about the Case Conceptualization and Change Theory Articulation Paper.

4. Oral Examination Reevaluation

If a student does not pass the oral examination, the committee of three core faculty members will provide the student with feedback about the oral examination performance to assist the

student in preparing for a re-examination. A member of the examination committee may be assigned to the student to provide guidance and advisement on their oral examination performance. The committee of three core faculty members will reconvene for a re-examination at a date determined by the Director of Training. Generally, the re-evaluation is at the time of the next exam administration. Should the student fail the Oral Examination twice, the student may file a formal request to the Core Faculty Committee in writing to obtain permission for additional attempts.

When a student petitions to retake a portion of the exam, the request should outline (1) why the student believes that they will be successful in the third attempt, (2) all of the steps that they are taking to prepare for the reexamination above and beyond what has been done for previous attempts, and (3) their timeline for accomplishing these steps leading up to the next exam period.

IX. PRACTICUM PLACEMENTS AND CLINICAL QUALIFYING EXAMINATION

Practicum experiences are designed to provide students with tiered and sequential opportunities to develop and practice clinical skills under the supervision of doctoral-level licensed psychologists. Students are evaluated for readiness to begin practicum work by review of their performance on competencies across learning experiences. Practicum experiences can begin as early as the second semester of study if prerequisite coursework has been completed as described in the *Practicum and Internship Handbook*.

Students must complete a minimum of 6 practicum experiences. Practicum experiences are expected to occur across diverse settings that include community mental health, testing/assessment sites, and schools. Diversity of client population is also expected (i.e., diagnostic, socioeconomic, developmental). Students must spend at least two semesters working with an underserved population. Students work closely with faculty to plan their practicum experiences. Details about Practicum experiences and placements can be found in the *Practicum and Internship Handbook*. All paperwork that must be completed as part of practicum experiences can also be found in the *Practicum and Internship Handbook*. All practicum sites and supervisors must be approved by the Program. A list of *currently* approved practicum sites can be found in *Appendix 7*.

Students complete the Clinical Qualifying Examination at the end of the semester (specific dates are provided in the Program Calendar) when they are scheduled to complete their final Tier-One practicum placement. Students must pass this exam to advance from Tier-One to Tier-Two placements. Details about the Clinical Qualifying Examination are emailed to students in the semester they are scheduled to complete the Examination. Site supervisor evaluations from previous placements are also used to determine readiness to continue practicum work.

In order to qualify for Tier-Two placements, students must pass the Clinical Qualifying Examination. The Clinical Qualifying Examination consists of analysis of case material developed by faculty. Students use the case material to develop a case formulation (diagnosis and treatment plan) and prepare a video of a client session that illustrates the application of the treatment plan. Details about the Clinical Qualifying Examination can be found on the Clinical

Qualifying Examination Canvas page. A scoring rubric is provided to guide student's work to ensure all required areas are addressed.

Students must enroll in a practicum course when completing practicum experiences. Course enrollment must be sequential and correspond with the level of training a student is completing.

- ED 792 Initial Practicum I (1)
- ED 793 Initial Practicum II (1)
- ED 794 Initial Practicum III (1)
- ED 840 PsyD Practicum I (1)
- ED 841 PsyD Practicum II (1)
- ED 842 PsyD Practicum III (1)
- ED 843 Advanced Clinical Experience I (1)
- ED 844 Advanced Clinical Experience II (1)
- ED 845 Advanced Clinical Experience III (1)

X. INTERNSHIP

Consistent with APA accreditation standards and state licensing guidelines, students must complete a one-year, full-time or a two-year, half-time internship in Counseling or School Psychology for the PsyD degree. Details about the Internship Process and associated Forms can be found in the *Practicum and Internship Handbook*.

The doctoral internship begins in summer or fall. The applications are due starting in late October of the preceding year. Students enroll in *ED 838 Seminar: Internship Preparation and Professional Development* in the spring semester of the academic year before they plan to submit applications.

Students must receive approval to apply for internship by completing the *Request for Permission to Apply to Internship form (Appendix 8)*, which must be endorsed by the student's practicum instructor, doctoral research project chair, and the Director of Training. In order to be considered eligible to apply for internship, students must complete the following portions of their program of study:

- Completed a minimum of 800 practicum hours, with 1000 hours recommended
- Successfully defended Doctoral Research Project proposal
- Successfully completed the Written and Oral Comprehensive Exams

All students must complete Part 2 of the APPIC (Association of Psychology Postdoctoral and Internship Centers) Application for Psychology Internship to verify Internship Eligibility and Readiness. This document requires the Director of Training to endorse the following item: "The faculty agrees that the student is ready to apply for internship (Yes or No)." This endorsement is not guaranteed based solely on student completion of program requirements. It is based on a holistic review by the Director of Training evaluating the student's academic and professional

progress during their time in the program, as described in *Section VII, Subsection 14: Competency Evaluation*.

Students are required to apply to APA-accredited and APPIC-member internship sites. These sites are described on-line through APPIC (http://www.appic.org/directory/4_1_directory_online.asp).

Internship sites listed in the APPIC directory require students to submit the APPIC *Application for a Psychology Internship* (AAPI), which is available from the APPIC web site (www.appic.org). Students register to participate in the APPIC Match through the National Matching Service.

Students enroll in ED 886 (0 credits) and ED 887 (0 credits) when completing their internship.

XI. DOCTORAL RESEARCH PROJECT

Students are required to complete a Doctoral Research Project as part of their Program of Study. Please refer to the *Doctoral Research Project Handbook* for a complete description of the processes, procedures, evaluation rubrics, and forms associated with the process. The Program provides several options for students to meet research competencies in both discipline-specific knowledge and profession-wide competencies and related elements, including completion of coursework on research and completion of the Doctoral Research Project.

Students must be continuously enrolled in ED 892 Directed Research in Psychology until they successfully defend the Doctoral Research Project proposal and in ED 896 Research in Psychology until they successfully defend the research project. Students must successfully defend their research proposal to be eligible to apply for an internship.

1. Doctoral Research Project Options

Students may satisfy the research project requirement by conducting a project in one of the following formats:

Empirical Study

The empirical study is an investigation of a problem in the field of psychology with one or more research questions or hypotheses that the student seeks to test and/or objectives that will be attained as a result of the study. The research proposal should include a brief statement of the reasons for the selection of the problem and the relationship of pertinent research literature to the problem, as well as the research and data analysis methods.

Case Study

The case study is a clinical description of a client that includes presenting problem, history, discussion of symptoms and impairment, diagnosis, and etiology. A treatment plan must be presented, as well as a literature review of evidence-based practices for treatment of the identified disorder. Finally, the student must submit a research proposal to study some aspect of the disorder and treatment discussed in the literature review.

Critical/Systematic Literature Review

The review is an organization, integration, and evaluation of previously published literature. Authors of literature reviews evaluate the progress research has made towards clarifying a specific problem or answering a specific question. A critical or systematic literature review is different from a traditional literature review in that it: is based on a clearly formulated question(s); identifies relevant studies; evaluates their quality; and summarizes the evidence by use of explicit methodology.

Theoretical Paper

The purpose of the theoretical paper is to address an important theoretical issue in the field of Counseling or School Psychology. The theoretical issue should be investigated thoroughly through a critical review of the literature in order to delineate the strengths and weaknesses in the content area in order to make an original contribution to the discussion through development of a theoretical position. The theoretical paper is expected to demonstrate a grasp of the issue, an understanding of how the issue has been addressed, and the development of an original theory on the issue.

A fuller description of the Doctoral Research Project options and related policies and procedures can be found in the *Doctoral Research Project Handbook*.

2. Doctoral Research Project Committee

Each student is responsible for convening a Research Committee to oversee the Doctoral Research Project. The Research Committee will consist of no fewer than three members. The membership of each student's Doctoral Research Project Committee will vary depending on the content and research methods appropriate to the research. Membership on the Doctoral Research Project Committee must be finalized *prior* to defense of the research proposal.

Members of the Doctoral Research Project Committee include the following:

Chair

The Chair is selected by the student from among core faculty members in the PsyD Program qualified to serve as Chair. The Chair helps the student define and focus on a research topic or interest, and supervises the research and writing associated with the research proposal and conduct of the research. This supervision occurs in concert with other members of the Research Committee. The Chair monitors the student's progress and has primary responsibility for ensuring that the student submits the documents necessary for successful participation in and completion of the Doctoral Research Project.

The responsibilities of the Chair of the Doctoral Research Project Committee also include:

- Helping the student select two other members of the Committee.
- Ensuring the student submits all appropriate documentation to the University's Institutional Review Board if human participants are involved in the research.

- Supervising the student's completion of the defense of the research proposal and defense of the research project, including any additional requirements specified by the student's Research Committee.

Research Committee Members

The second Committee member shall be a core or associated faculty member in the Division of Education and Counseling at Rivier University. The third Committee member need not be a member of the faculty at Rivier University. However, the person must: be currently employed at an accredited college or university; possess a doctoral degree or terminal degree in their field of study; and have a proven and documented record of scholarship and/or clinical experience relevant to the topic of the student's research. The student must provide the name, credentials, CV, and argument for inclusion of the individual to the Chair and second member of the Doctoral Research Project Committee.

The responsibilities of Committee members include:

- Assisting the student in the preparation and defense of the research proposal, the execution of the research project, compliance with IRB policies and professional ethical research standards, writing of the research, preparation for the research defense, and submission of final copies of the research to the appropriate offices and the Regina Library.
- Supervising and assisting the student in making changes in the research materials as stipulated by the Chair of the Research Committee following the defense of the proposal and of the dissertation.

The membership of a student's Doctoral Research Project Committee may be changed at any time up to the point of submission of the research proposal to the Committee Chair and the convening of the proposal defense. After the research proposal defense the student cannot change the membership of the Doctoral Research Project Committee *except* in the case of the lack of availability of a current member to serve and with the approval of the Director of Training. A student may change the Chair of their Research Committee prior to the research proposal and only with the approval of the Director of Training.

To change a member of the Doctoral Research Project Committee the student must take the following steps:

- The student must recommend a faculty member to join the Doctoral Research Project Committee in place of or in addition to the current membership of the Committee.
- If the recommended change is approved by the Director of Training, the student must complete the Petition to Change Research Committee Membership form (*see Doctoral Research Project Handbook*).
 - *Note:* This form requires the signatures of the student, the current members of the Research Committee (including any outgoing member or members), the new member of the Committee, and the Director of Training.

- The student must submit the completed and signed original Petition to Change Research Committee Membership form to the Director of Training prior to the Doctoral Research Project proposal defense.

XII. POLICIES AND PROCEDURES

This section of the *Handbook* describes the policies and procedures applicable to students in the Program. Many policies correspond to the policies of the Academic Catalog (2021-2022) and the Student Services Catalog (2021-2022) that can be found at:

<https://catalog.rivier.edu/index.php>

Changes, revisions, or substitutions to the policies or procedures here would ordinarily be made at the end of the academic year. Changes are communicated in writing to students in the Program in the form of addendums in appendices to this *Handbook*. The most current version of the *Handbook* is distributed to incoming students annually at the start of the academic year.

1. Student Rights and Responsibilities

All students who enter the Program are bound by a Code of Professional Conduct. The Code contemplates that professional, ethical and mature behavior is expected of each student at all times. Every student must conduct themselves from the moment of matriculation with maturity and professionalism. Every graduate student is expected to read the code and be responsible for its contents.

The full Code of Conduct can be found here:

<https://catalog.rivier.edu/content.php?catoid=114&navoid=2089#grad>

2. Statement of Nondiscrimination

Rivier University does not discriminate on the basis of race, color, national origin, religion, age, veteran or marital status, sex, sexual orientation, gender identity or disability in admission or access to, treatment in or employment in its programs and activities. Please see full statement of nondiscrimination and related information here: <https://www.rivier.edu/notice-of-nondiscrimination/>

3. Academic Standing

The requirements below apply for students to be considered in good academic standing in the Program. In all other matters of academic standing, refer to the *Rivier University Catalog, 2021-2022*.

- A student must maintain a cumulative GPA of B (3.0) over the course of enrollment in the program.
- The student will have up to three semesters to reestablish a proficient GPA.

- Courses in which the student received a grade of BC (2.5) or lower must be repeated to improve the grade.
- All failing grades (any grade below a B) will remain on the student's transcript; however, a failed course may be repeated once, with only the grade of the student's second attempt being included in the calculated GPA.
- A student who fails two courses may be dismissed from the Program.

4. Annual Review

All students are reviewed annually by the Core Faculty Committee in collaboration with the student. The annual review assesses student progress toward competencies and elements as well as completion of the Program of Study.

Students are expected to submit evidence of progress toward meeting each competency and element (see *Appendix 9* for sample form for submission). Evidence is drawn from learning experiences in the Program that include:

- Core Coursework
- Integrated Assignment from Basic Content Area Cluster
- Written Comprehensive Examinations (three parts, described in *Section VIII*)
- Oral Comprehensive Examination
- Practicum Placements
- Internship
- Doctoral Research Project
- Disposition Forms (*Appendix 10*)

Students also submit a *Professional Goals and Activities form* (*Appendix 12*).

Review of the evidence submitted by students from their learning experiences and their *Professional Goals and Activities form* are the basis of the student annual review. Students meet with their academic advisor and/or the Director of Training to review their progress in the Program as demonstrated by the submitted evidence. Results of this review are communicated to the student in writing. A copy of the results are kept in the student's file.

Students who fail to meet minimum levels of achievement (See *Section VII, Subsection 13: Minimum Levels of Achievement*) or whose progress toward competencies or elements has been rated by faculty as below the expected level (i.e., none to minimal progress in areas where progress is expected based on program of study), will be placed on an action plan to address the areas of concern. Failure to meet the requirement of an action plan may result in dismissal from the program.

5. Triggered Reviews and Unsatisfactory Student Progress

If any instructor's evaluation of student performance and/or course outcomes is not satisfactory at any time prior to the annual review, this deficiency must be brought to the attention of the Director of Training, in writing. The Director may ask for a triggered review of the student's

performance by the Core Faculty Committee. Any faculty member with concerns about a student's academic, professional, or ethical performance may request a triggered review of the student at any time by submitting a written request to the Director of Training. The Director of Training may also initiate a triggered review if a student fails to achieve the minimum level of achievement (a grade of "B" or better) in any course.

Upon the completion of a review that results in a determination of unsatisfactory student progress or unacceptable Student Behavior, the Director of Training schedules a meeting with the student and the Core Faculty Committee to discuss the student's performance. At this meeting, an action plan is developed that outlines the steps for improvement, including a timeline. The student and the Director of Training or his/her designee will meet on a regular basis, no less than once each semester, to review progress to fulfill the action plan.

6. Academic Appeal

When a student wishes to appeal an academic decision in the Program, the following academic grievance policies are identified and followed for the student. Academic grievances are defined as those pertaining to grades (course and assignment), annual reviews, complaints, and dismissals.

Grade Review

As described in the Academic Catalog 2021-2022 (<https://catalog.rivier.edu/index.php>):

"Students have the right to request a review of a final grade. All such requests must address the process followed in arriving at the final grade and not the professor's evaluation of the student's work. A request for a review of a final grade must be made in writing by the student to the instructor of the course no later than 15 calendar days from the posting of the official grade report by the Office of the Registrar. The student sends a copy of this request to the divisional dean. If there is no resolution between the student and the instructor, and the student continues to believe the grade to be in error, the student may appeal in writing to the department coordinator/program director in which the course was offered, or to the divisional dean if the grade review is between the student and the department coordinator/program director. If no satisfactory resolution is reached after contacting the department coordinator/program director, the student may appeal to the divisional dean. The dean will make the final decision, which is binding, and send notification of the decision to the Office of the Registrar for processing."

Academic Grievance Procedure

In addition to the above-noted Grade Review procedure, Rivier University outlines the Academic Grievance Procedure in its *Graduate School Catalog* (see <https://catalog.rivier.edu/content.php?catoid=114&navoid=2089#grievance>).

7. Academic Integrity

As described in the Academic Catalog 2021-2022 (<https://catalog.rivier.edu/index.php>):

“Academic integrity involves the thorough, accurate, and systematic discussion, presentation, reporting and publication of information. Academic integrity is a cornerstone of the teaching and learning in which all members of our community are engaged.

When considering student work, academic integrity assumes and expects that academic work is solely the product of the student. Plagiarism and cheating are breaches of academic integrity. In general, plagiarism is defined as the presentation of someone else’s work as the student’s own without complete acknowledgement of the source of the material. Quoting or using another person’s argument from another source without acknowledgement of the source or its relationship to other sources constitutes plagiarism. Cheating is defined as the giving or receiving or attempting to give or receive unauthorized information or assistance during an examination, study, or project. Submission of a single work for two separate courses without the permission of both instructors prior to submission is also a form of cheating.

Instructors will communicate clear expectations regarding assignments, including group work and group projects. If students are unsure whether a specific course of action would constitute academic dishonesty, they should consult with the relevant instructor before proceeding.

When academic integrity is violated, by plagiarism, cheating or other unethical conduct, sanctions may be applied. The nature of the sanctions varies with the type, degree or repetition of an act of academic dishonesty in the judgement of the instructor and the institution. Depending on the nature of academic dishonesty sanctions may take the form of one or more of the following:

- student discussion with the instructor about the nature of the offense that results in reassurance and commitment to improvement;*
- individualized action plan with identified steps and timeline to achieve the appropriate outcomes;*
- rewriting and submission of the academic work in question with or without grade penalty;*
- a grade penalty up to and including a grade of “F” or zero for the work in question;*
- notification of the divisional dean of the infraction and reason for recommending a review;*
- review by the dean and meeting with student and instructor to determine facts related to allegations and to impose other sanctions as appropriate;*
- other academic sanctions up to and including dismissal from the university.*

All efforts should be made to conduct ourselves with dignity, integrity and a just consideration for those with whom we interact. Often, disagreement can best be resolved by the individuals directly involved. However, there may be instances when this does not occur.”

Please refer to Academic Catalog 2021-2022 for a review of the procedure that is followed if the Academic Integrity Policy is violated.

8. Withdrawal

If a student wishes to withdraw from the Program or from a course within the Program, the student must follow the procedures outlined in the most current *Academic Catalog (2021-2022)* and complete the University's *Withdrawal form*, which is submitted to the Director of Training. If a student decides to withdraw from the program, they cannot automatically reenroll. They need to follow the procedures for reenrollment outlined in the section below.

9. Leave of Absence

Students seeking a leave of absence to address professional, personal, or familial obligations should submit a written request to the Director of Training. The student may officially apply for a leave of absence by completing the University's *Leave of Absence form* and submitting it to the Director of Training at least two weeks prior to the end of the semester preceding the anticipated leave. Leaves of absence are not granted for semesters that are underway and may not be used to preclude completion of a course or requirements for a course.

The Director of Training must approve all leaves of absence. A letter of explanation of the specific reasons for requesting the leave must accompany the form. A leave of absence may be granted for one or two semesters. In cases in which a student requires more than two semesters or wishes to extend an already approved leave of absence, the Core Faculty Committee must review the student's request to determine whether additional leaves will be considered. The Director of Training forwards the form and the letter of explanation, with the necessary signatures granting the leave of absence, to the Office of the Registrar. The student rejoins the Program at the point in the Program of Study at which they left.

10. Reenrollment

In order to enter the Program after a withdrawal, the student must submit a *Reenrollment Application form* (see *Appendix 12*) to the Director of Training. The Director of Training reviews the student's application, along with the records associated with the withdrawal, and then confers with the Core Faculty Committee and makes a recommendation about reentry to the Dean of the Division of Education and Counseling, who makes the final decision about reenrollment. A student who withdraws from the program and wishes to reenroll may be required to complete the standard admissions process (see *Section VI: Program Admission*) during the next admissions cycle. The Director of Training notifies the student of the final decision. The reentry recommendation includes the plan for reenrolling and completing coursework and other requirements in a timely manner.

11. Dismissal

Students can be dismissed from the program for academic dishonesty, engagement in unethical behavior as defined by the APA Code of Ethics, failing more than one required course, failure to meet program requirements, or failure to meet the requirement of an action plan. Dismissal from the PsyD Program is not a dismissal from the Department of Education and Counseling or

the University. A student dismissed from the PsyD Program could apply to and be admitted to another program at the University.

12. Student Services

Rivier University provides a variety of student services that can be found on the Rivier website at <http://www.rivier.edu/student.aspx?id=89>. In addition, students should review *Appendix 13* for information regarding Disabilities/Special Needs, Financial Aid, ID Cards, Student Parking, Veterans, Sexual Harassment, and the University Nondiscrimination Statement.

XIII. PROFESSIONAL ORGANIZATIONS

Students are required to join at least one professional organization relevant to the field of counseling and school psychology. Membership in professional organizations contributes to student mastery of some program competencies. Students receive significant discounts on membership rates. Below are examples of some organizations relevant to Program aims.

American Psychological Association–APA represents all disciplines within psychology. APA’s Division 16 represents School Psychology exclusively, while Division 17 represents Counseling Psychology. The American Psychological Association of Graduate Students (APAGS) is the voice of student concerns within the APA. APAGS develops, endorses, and disseminates information to students about relevant education and training issues, legislative positions and developments, and future directions or changes in the field through printed resources and the website. APAGS also supports students in the form of scholarships and awards, association advocacy work, and a host of development activities. Students who join APA as student affiliates automatically become members of APAGS.

National Association of School Psychologists–NASP is the national association for school psychologists. Members receive a monthly newsletter and a quarterly journal, *School Psychology Review*.

New Hampshire Psychological Association–NHPA is the state affiliate of the national organization. NHPA sponsors an annual student convention, fall and spring annual meetings, and numerous continuing education events throughout the year.

New Hampshire Association of School Psychologists–NHASP is the state affiliate of the national organization. NHASP publishes a quarterly newsletter and sponsors an annual conference.

IVX. APPENDICIES

- Appendix 1: List of Program Faculty Members
- Appendix 2: Program of Study Form
- Appendix 3: Core Course Offering Schedule
- Appendix 4: Request for Course Transfer Form
- Appendix 5: Curriculum Map
- Appendix 6: Eligibility for Comprehensive Examination Form
- Appendix 7: List of Program Approved Practicum Sites
- Appendix 8: Request for Permission to Apply for Internship Form
- Appendix 9: Learning Experience Evidence Submission Form
- Appendix 10: Disposition Forms
- Appendix 11: Professional Goals and Activities Form
- Appendix 12: Reenrollment Application Form
- Appendix 13: Student Services
- Appendix 14: Statement of Acknowledgement

Appendix 1: List of Program Core Faculty Members

Angela M. DeSilva Mousseau, PhD, Boston College

Professor in Education and Counseling

Licensed Psychologist (MA)

Director of Training, Combined Program in Counseling and School Psychology, PsyD

Specialty Areas: Child Psychology; Positive Psychology; Research Methods and Data Analysis

Elizabeth Harwood, PhD, University of Montana

Assistant Professor in Psychology

Department Coordinator, Department of Psychology

Specialty Areas: Best Practices in Teaching, Depression; Relationship Conflict and Satisfaction; Body Dissatisfaction; Substance Abuse.

Carol Langelier, PhD, Northeastern University

Professor in Education and Counseling

Licensed Psychologist (NH)

Director, Graduate Counseling & School Psychology Programs

Specialty Areas: Cognitive Behavioral Therapy (CBT); Diversity in Counseling and Leadership; School Counseling; Cultural Context of Education; Assessment, Diagnosis and Treatment

Cheryl Maykel, PhD, University of Connecticut

Associate Professor of Education and Counseling

Nationally Certified School Psychologist (NCSP)

Specialty Areas: Mind-Body Health and Wellness; Childhood Obesity; School Psychology; Ethics in Human Subjects Research

Kate Murphy, PsyD, Rivier University

Assistant Professor of Education and Counseling

Licensed/Certified Doctoral School Psychologist

Licensed Mental Health Counselor (LCMHC)

Master Licensed Alcohol and Drug Counselor (MLADC)

Certified Group Psychotherapist (CGP)

Specialty Areas: Substance Abuse; Severe and Persistent Mental Illness; Disabilities; Social Justice; School-Based Interventions for Emotional Disabilities

Jesslynn Rocha-Neves, PhD, University of Connecticut

Assistant Professor of Education and Counseling

School Psychology Endorsement: State of New Hampshire

School Psychology Endorsement: State of Connecticut

NASP PREPaRE: School Crisis Prevention and Intervention Certification

Specialty Areas: School Psychology; Educational Equity; School Climate Assessment and Intervention; Marginalized Student Populations; School Law; International School Psychology

Appendix 5: Curriculum Competency Map

	Core Courses	Integrated DSK Assignment	Written Comprehensive Exam: Multiple Choice	Written Comprehensive Exam: Theory and Case	Oral Comprehensive Exam	Practicum Experiences	Internship	Doctoral Research Project	Disposition Forms
Competency 1: Discipline Specific Knowledge									
Discipline-specific knowledge represents the requisite core knowledge of psychology an individual must have to attain the profession-wide competencies									
Element 1a: Students demonstrate an appropriate mastery of the discipline specific knowledge in health service psychology (e.g., developmental, biological, cognitive, affective, and social aspects of behavior, and the history of the discipline of psychology).	ED801 ED802 ED803 ED804 ED820 ED825		✓						
Element 1b: Students demonstrate a substantial understanding of the integration of discipline specific knowledge of health service psychology.	ED825	✓							
Element 1c: Students demonstrate knowledge and competence in research methods, quantitative analysis, and psychometrics.	ED809 ED864 ED881		✓					✓	
Competency 2: Communication and Interpersonal Skills									
Element 2a: Develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.	ED833			✓	✓	✓	✓	✓	✓
Element 2b: Produce and comprehend oral, nonverbal, and written communications that are informative and well integrated; demonstrate a thorough grasp of professional language and concepts.	ED806 ED810 ED812 ED815 ED816 ED833		✓		✓	✓	✓	✓	✓
Element 2c: Demonstrate effective interpersonal skills and the ability to manage difficult communication well.	ED833				✓	✓	✓	✓	✓
Competency 3: Professional Values and Attitudes									
Students demonstrate behavior that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.									
Element 3a: Students behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.	ED833				✓	✓	✓	✓	✓
Element 3b: Students engage in self-reflection regarding one's personal and professional functioning; engage in activities to maintain and improve performance, well-being, and professional effectiveness.	ED838				✓	✓	✓	✓	✓
Element 3c: Students actively seek and demonstrate openness and responsiveness to feedback and supervision.	ED810 ED812				✓	✓	✓	✓	✓
Element 3d: Students respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.						✓	✓		✓
Competency 4: Assessment									
Students develop knowledge and skills in evidence-based theories and methods of assessment and diagnosis, including the selection, administration, and interpretation of assessments consistent with best scientific research evidence, the science of measurement, and psychometrics.									
Element 4a: Students demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology	ED806 ED810 ED812 ED825		✓		✓	✓	✓		
Element 4b: Students demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural).	ED806 ED810 ED812 ED825		✓		✓	✓	✓		
Element 4c: Students demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process.	ED806 ED810 ED812 ED825		✓		✓	✓	✓		
Element 4d: Students interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision making biases, distinguishing the aspects of assessment that are subjective from those that are objective.	ED810 ED812		✓		✓	✓	✓		
Element 4e: Students communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.	ED810 ED812		✓		✓	✓	✓		

	Core Courses	Integrated DSK Assignment	Written Comprehensive Exam: Multiple Choice	Written Comprehensive Exam: Theory and Case	Oral Comprehensive Exam	Practicum Experiences	Internship	Doctoral Research Project	Disposition Forms
Competency 5: Intervention: Students will develop proficiency in knowledge and practice of evidence-based approaches to the treatment of client's problems and needs, respectful of client's values, preferences, and diverse backgrounds.									
Element 5a: Students establish and maintain effective relationships with the recipients of psychological services.						✓	✓		
Element 5b: Students develop evidence-based intervention plans specific to the service delivery goals.	ED806 ED815 ED816 ED825		✓		✓	✓	✓		
Element 5c: Students implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.	ED806 ED815 ED816 ED825		✓		✓	✓	✓		
Element 5d: Students demonstrate the ability to apply the relevant research literature to clinical decision-making.	ED806		✓		✓	✓	✓		
Element 5e: Students modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking.			✓		✓	✓	✓		
Element 5f: Students evaluate intervention effectiveness, and adapt intervention goals and methods consistent with ongoing evaluation.			✓		✓	✓	✓		
Competency 6: Supervision Students develop skills in mentoring and monitoring other professionals to help develop skill in professional practice									
Element 6a: Students demonstrate foundational knowledge and initial skills in the instruction, oversight, and supervision of trainees and other professionals.	ED833						✓		
Competency 7: Individual and Cultural Diversity: Students will develop knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.									
Element 7a: Students demonstrate an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves.	ED810 ED812 ED815 ED816 ED821 ED825 ED833		✓		✓	✓	✓		✓
Element 7b: Students demonstrate knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.	ED810 ED812 ED815 ED816 ED821 ED825 ED833		✓		✓	✓	✓	✓	
Element 7c: Students demonstrate the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability to apply a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own. Trainees are expected to respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.			✓		✓	✓	✓	✓	

	Core Courses	Integrated DSK Assignment	Written Comprehensive Exam: Multiple Choice	Written Comprehensive Exam: Theory and Case	Oral Comprehensive Exam	Practicum Experiences	Internship	Doctoral Research Project	Disposition Forms
Competency 8: Research: Students develop the ability to independently formulate research or other scholarly products that are of sufficient quality and rigor to contribute to the scientific, psychological, or professional knowledge base and acquire the knowledge and skills necessary for the critical review, evaluation, and presentation of psychological and research literature.									
Element 8a: Students demonstrate and utilize substantial knowledge and skills and application in basic quantitative methods and data analysis, research design, and psychological measurement commonly used in psychology	ED809 ED864 ED881		✓					✓	
Element 8b: Students demonstrate and utilize skills in advanced research methods and data analysis appropriate in conducting research.	ED864 ED881		✓					✓	
Competency 9: Ethical and Legal Standards: Students develop knowledge of, and adhere to, all relevant ethical and legal standards, guidelines, laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels in their professional work.

Appendix 9: Learning Experience Evidence Submission Form

Competency Portfolio Artifact Cover Sheet (Sample)

Competency 7: Individual and Cultural Diversity

Students will develop knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.

Element 7a. Students demonstrate an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves.

Element 7b. Students demonstrate knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.

Element 7c. Students demonstrate the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability to apply a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own. Trainees are expected to respond professional in increasingly complex situations with a greater degree of independence as they progress across levels of training.

Artifact: Which of the following artifacts is this cover sheet accompanying?

___ 1. Core Coursework: ED___	___ 2. Disposition Forms
___ 3. Doctoral Research Project Proposal	___ 4. Doctoral Research Project Final Document
___ 5. Comprehensive Examination a. Multiple Choice b. Theoretical Change Paper c. Case Conceptualization d. Oral Examination	___ 6. Practicum Placement a. Case Study/Presentation b. Video of Therapy Session c. Supervisor Evaluation/Rating Form
___ 7. Internship (Supervisor Evaluation or Rating Form)	___ 8. Integrated Basic Content Areas Assignment

Demonstration of Competence: Which Objectives do you believe are met through these artifacts?

Competency 7: Individual and Cultural Diversity
___ 1a
___ 1b
___ 1c

Rationale: In 300-500 words, please explain why you believe this artifact demonstrates the denoted competencies and why you chose to include it in your portfolio. You may continue onto a second page.

Appendix 10: Disposition Forms

Annual Student Disposition Form (Self-Rating)

Student Name: _____

Date: _____

Year in Review: _____

The evaluation of outcome competencies of the Rivier Counseling and School Psychology Program is intended to provide feedback on student progress toward achievement of program competencies and related elements. Students must obtain a faculty rating of 3 or better in order to be making adequate progress in the program toward the below competencies and elements:

Competency 2: Communication and Interpersonal Skills

Students develop the ability to communicate and use interpersonal skills effectively in increasingly complex situations with increasing independence.

Element 2a: Students utilize knowledge and skills to develop and maintain effective relationships with a wide range of individuals and produce and comprehend oral, nonverbal, and written communications that are informative and well integrated.

Element 2b: Students demonstrate a thorough grasp of professional language and concepts while demonstrating effective interpersonal skills and the ability to manage difficult communication well.

Competency 3: Professional Values and Attitudes

Students demonstrate behavior that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.

Element 3a: Students demonstrate and utilize appropriate knowledge, skills, and attitudes in reflecting on, critically evaluating, and improving one's own professional practices.

Element 3b: Students demonstrate openness and responsiveness to feedback from peers, faculty, supervisors, and consumers of services.

Element 3c: Students and graduates will perform activities consistent with those identified in health service psychology including licensure (where appropriate), membership and/or participation in national, state, and local organizations, and through their expressed professional goals.

Please rate yourself on each element using the following scale:

1 (Never) 2 (Occasionally) 3 (Usually) 4 (Always) N/A (No basis for judgment)

Professional Attitudes and Values	Rating		Communication and Intra/ Interpersonal	Rating
1. Engages enthusiastically in the doctoral learning process. (3a, 3b)			12. Demonstrates knowledge and skill to maintain relationships (2a)	
2. Displays openness and responsiveness to feedback (3b)			13. Collaborates effectively with a wide range of individuals. (2a)	
3. Demonstrates initiative suitable to the context. (3a, 3b)			14. Contributes relevant information during group activities. (2b)	
4. Behaves in ways that reflect the values and attitudes of psychology. (3a)			15. Considers all points of view and demonstrates a respect for diversity. (2a)	
5. Prepares, organizes, and meets assignment due dates. (3a)			16. Handles conflict or difficult communication professionally. (2b)	
6. Demonstrates reliability and arrives on time and attends class consistently. (3a)			17. Communicates effectively and respectfully in both written and oral communications. (2a)	
8. Maintains membership and appropriate involvement in professional organizations and activities. (3c)			18. Maintains professional boundaries with all individuals. (2a, 3b)	
10. Dresses appropriately for the situation and is well groomed. (3a)			19. Demonstrates good judgment and discretion when interacting with others. (2b, 3a)	
11. Reflects on own practices and behavior. (3a)				

Narrative Comments: Please take a few minutes to include comments about your overall performance.

Appendix 11: Professional Goals and Activities Form

Professional Goals and Activities

Please complete and submit to your Academic Advisor for your Annual Review.

Student Name: _____

Date: _____

Year in Review: _____

1. Please describe your career goals.

2. Please describe any research-related activities you have been involved in.

3. Please list any professional publications you have contributed to in the past year.

4. Please list any professional presentations you have given in the past year.

5. Please list any conferences or workshops you have attended in the past year.

6. Please list any conferences or workshops you have led in the past year.

6. Please list all Professional/Research Organizations of which you are a member.

7. Please list all leadership roles you have held in Professional/Research Organizations.

Appendix 12: Reenrollment Form

Application for Reenrollment

A complete review of the applicant's academic record will be conducted by the Core Faculty Committee of the Program with the approval of the Dean of the Division of Education and Counseling prior to any decision to re-enroll a former student in the program. If the request is approved, conditions for reenrollment may be specified.

Please complete and submit this form to the Director of Training.

Name: _____

Rivier Identification Number: _____

Year Admitted to the Program: _____

Term of Last Enrollment: _____

Proposed Term of Reenrollment: _____

Please describe in detail the reason(s) you wish to reenroll in the Program at this time and the ways in which you plan to be successful, if the Core Faculty Committee approves your reenrollment.

Appendix 13: Student Services

Student Services

Rivier University provides a variety of student services that can be found on the Rivier website at <https://catalog.rivier.edu/content.php?catoid=114&navoid=2087>. In addition, students should be aware of the following, the details of which can be found at the above website.

Disabilities/Special Needs

A student who requires special services for a learning or physical disability is encouraged to contact the Office of Disability Services at (603) 897-8497 to inquire about services available to help the student succeed academically.

Financial Aid

Policies and procedures for financial aid are available at:

<https://www.rivier.edu/financial-aid/>

ID Cards

Prior to the beginning of classes all new students must obtain a valid University ID, which is issued by the Department of Public Safety and Security Office, located at the Dion Center, Room 204. Information can be found on the Rivier website at:

<http://www.rivier.edu/student.aspx?id=803>

Student Parking

All students with a car parked on campus are required to have a Rivier University student parking sticker. Information can be found on the Rivier website at:

<https://catalog.rivier.edu/content.php?catoid=114&navoid=2087>.

Veterans

In cooperation with the Department of Veterans Affairs, Rivier University participates in numerous veterans benefits programs. Information can be found on the Rivier website at:

<https://www.rivier.edu/admissions/veterans/>

Sexual Harassment Policy

Harassment on the basis of sex is a violation of Section 703 of Title VII/IX of the Civil Rights Act of 1964. All members of the University community (students and employees) must be afforded protection under the provisions of this Act. As a matter of institutional policy, Rivier University will not tolerate behavior, either verbal or physical, by a member of the University community that leads to sexual harassment of another member of the University community. Any incident of alleged sexual harassment should be reported immediately to the Assistant Vice President for Student Development or the Director of Human Resources. Copies of the Sexual Harassment Policy can be obtained from the Office of Human Resources or the Assistant Vice President for Student Development.

Nondiscrimination Statement

Rivier University does not discriminate on the basis of race, color, national origin religion, age, veteran or marital status, sex, gender identity, sexual orientation or disability in admission or access to, treatment in or employment in its programs and activities (except in the limited condition of a bona fide job qualification-BFJQ) and Title IX requires that the University not discriminate on the bases stated above.

This policy prohibits implying or threatening that an applicant's or a community member's race, color, religion, sex, national origin, age, disability, marital status, veteran status, or disabled veteran status will have any effect on the individual's education, matriculation, employment, job assignment, wages, promotion, or any other condition of learning, employment or future job opportunities (except in the limited condition of a bona fide job qualification). This policy also prohibits any conduct that would tend to create an intimidating, hostile or offensive work environment.

Appendix 14: Statement of Acknowledgement

STATEMENT of ACKNOWLEDGEMENT Rivier University

My signature below acknowledges receipt of the Rivier University, Combined Doctoral Program in Counseling and School Psychology Handbook. It further acknowledges that I have read the Handbook *in its entirety* and that I understand my responsibilities as a student in the PsyD program in agreeing to abide by all policies and procedures described, herein.

I also understand that should I have any problems or questions regarding the policies as they are presented in this handbook, I may direct them to the Director of Training.

I understand that departmental policies and handbook information are subject to revision throughout my program and I am responsible for remaining current.

This acknowledgement will be placed in my student file.
